

## [ 1 ] Suicide Prevention

Applicants are required to submit an abstract that includes some of the items 1-4 below.

### 1. Background factors as a country

Describe the situation of suicide in your country, its economic impact, prevalence of mental disorders leading to suicide, age structure, and social problems in the social context (e.g. poverty). if relevant statistics are not available, describe the challenges in your country.

### 2. Systems for treatment and consultation

Are early intervention and counseling for suicide provided as a medical service in your country? Describe the flow of medical and administrative services to those with suicidal ideation or who have attempted suicide. Describe the number of treatment facilities, availability and content of standard treatment programs, consultation facilities and systems, cooperation between hospitals and clinics, scope of consultation, and medical insurance coverage.

### 3. Prevention and Education

Describe prevention education for citizens (e.g., mental health education), approaches to individuals at high risk of suicide (e.g., how to identify them), patient support, family support, supporter training, and the development of suicide prevention applications using AI technology.

### 4. Future Prospects

Please share your thoughts on future suicide prevention measures in your country, or measures that you think are desirable nationally or globally.
